

#Overview This extension will allow your customers to Show categories on any page,

Login into the admin and goto the Content > Widgets > click on Add Widget button. - Under Settings tab > Type > select the Catalog Category Grid and follow the default magento steps to create Widget.

#Features Allow your customers to show Categories on any page in Magento 2. Allow your customers to setup the show Number of Categories into frontend and also set the Conditions.

#Benefits We can attract the end user to see more option based on current category. for eg. end user browse the Kids category, there we can show the this Categories Girl's, Boy's.
